DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 11-16 and 30, drawn to a method for detecting or determining delivery and expression of a nucleic acid introduced into a cell comprising a labeled nucleic acid molecule comprising a reporter gene, classified in class 435, subclass 6.
- II. Claims 9, 10, 17-29, 31 and 32, drawn to a method for screening agents for their ability to deliver a nucleic acid molecule into a cell and a method for monitoring the delivery of a nucleic acid molecule into a cell comprising a labeled nucleic acid molecule and the delivery agent, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the method of invention II does not require that the introduced nucleic acid molecule comprise a reporter gene according to the method of invention I to be functional and

Art Unit: 1636

patentable. The subcombination has separate utility such as to determine the functional characteristics of a promoter element operably linked to the reporter gene.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel M Sullivan whose telephone number is 703-305-4448. The examiner can normally be reached on Monday through Friday 8-4:30.
